

**INTERPRETATIONS & APPLICATIONS  
OF BUILDING CODES & REGULATIONS #88-15**

**CODE SECTION : IBC 106.1.1**

**05/13/96 rev. 5/10/04**

**SUBJECT : BUILDING CODE DATA**

Building code data is a necessary factor in the classification of buildings. This information is used to permanently identify the building use, construction type and exiting requirements based upon a determined number of occupants.

The following building code data shall be required on all permit applications, construction plans, building permits and certificates of occupancy :

- 1) Occupancy Group(s)
- 2) Type of Construction
- 3) Floor Area
- 4) Height and number of stories
- 5) Occupant Load
- 6) Fire sprinkler status
- 7) Address of the project

The above data shall be determined in accordance with the currently adopted edition of the City of Scottsdale Building Code (Scottsdale revised code, chapter 31, article III).
